This management report of fund performance contains financial highlights but does not contain either the complete interim financial report or annual financial statements of the investment fund. You can get a copy of the financial statements at your request and at no cost, by contacting LDIC Inc. in one of the methods below.

Unitholders may contact LDIC Inc. to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure by calling 416-362-4141, by writing to us at 130 King Street West, Suite 2130, Toronto, ON, M5X 1E2 or by visiting our website at [www.ldic.ca](http://www.ldic.ca) (email at [info@ldic.ca](mailto:info@ldic.ca)), or SEDAR at [www.sedar.com](http://www.sedar.com).

### **Investment Objectives and Strategies**

The Fund's investment objective is to provide holders of Units ("Unitholders") with long-term total return through distributions and capital appreciation of the Fund's investment portfolio (the "Portfolio") by investing in equity and debt securities of issuers that derive a significant portion of their revenue or earnings from medical and healthcare products and/or services. Such issuers may include, but will not be limited to, issuers operating in the following healthcare industry sub-sectors: (i) healthcare services, financials and insurance; (ii) healthcare products and technology; (iii) healthcare facilities and real estate investment trusts; and (iv) retirement lifestyle, wellness and entertainment (collectively, the "Healthcare Issuers").

The Fund has been created to invest in an actively managed Portfolio comprised primarily of publicly traded issuers and private issuers that derive a significant portion of their revenue or earnings from medical and healthcare products and/or services. The Fund will be invested primarily in publicly traded healthcare equity securities (the "Public Portfolio"), but may also invest up to 20% of the Fund's total assets in private equity investments (the "Private Portfolio"). It is expected that the Public Portfolio will be comprised of securities of 20 to 30 large, mid, and small capitalization publicly-listed Healthcare Issuers based in developed markets.

Through the Private Portfolio, LDIC Inc. ("LDIC" or the "Manager") will seek to enhance returns by investing in "late-stage" private equity investments in healthcare and healthcare related businesses. "Late-Stage" means an investment in a revenue-generating or soon-to-be revenue-generating business that is expected to go public or achieve another liquidity event within 12 to 24 months following the initial investment. The goal of the Manager is to provide investors with exposure to a limited number of investments in the Private Portfolio that it believes have potential for significant upside because the Fund will be investing at "pre-Initial Public Offering" prices. The Fund expects to make Private Portfolio investments at a point where the capital will be used to grow revenues of the healthcare business investee company. The healthcare business investee company may then seek to raise additional capital in public markets, or in some instances consider a sale of the business to a strategic or financial buyer.

## **Risk**

An investment in the Fund involves risks. Certain risk factors relating to the Fund and the Units are listed below. Additional risks and uncertainties not currently known to the Manager or Industry Advisor, or that are currently considered immaterial, may also impair the operations of the Fund. An investment in the Fund is appropriate only for investors who have the capacity to absorb a loss on their investment and who can withstand the effect of potentially having no distribution being paid in any period. As the value of the Units of the Fund will be based upon the value of the Portfolio, risks relating to the Portfolio will affect investors in the Fund. The following are certain risk factors and considerations related to the Fund which prospective investors should consider before purchasing Units:

- No assurance on achieving investment objective

## **Recent Developments**

The major trends supporting the health sector as a sound place to invest are intact. Aging of the population continues with the most rapid growth in the population over 85 years of age who are the highest users of health services. Also the continuing progress of health technology – pharmaceuticals; medical technology and informatics are also expanding markets for new products. The COVID pandemic has temporarily impacted health care services. Many elective surgeries have been delayed but will these surgeries be done when pandemic is under control. Massive new investment is being undertaken in COVID19 medicines and vaccines. The result of the pandemic will be a permanent increase in global health spending which will benefit the health sector.

The 2020 Presidential election campaign underway in the United States will generate uncertainty and potentially increased volatility for the health sector. The Republican incumbent President Trump and the Democratic candidate for President Joe Biden have advocated for greater price controls on pharmaceuticals. These policy proposals, while a long distance from actual legislative change, have a tendency to undermine investor confidence in parts of the health sector.

Once the Presidential election concludes in November 2020 it will be much clearer what policy regime the health sector will operate within. There is a wide range of possibilities which may result in a more volatile performance for health equities in 2020.

The pandemic will eclipse all other health issues until effective treatments and vaccines are proven and widely available.

(1) The information is provided as at December 31 / June 30 of the period(s) shown, as applicable.

(2) Management expense ratio is based on total expenses (excluding broker commissions and other portfolio transaction costs before income taxes) for the stated period and is expressed as an annualized percentage of daily average Net Asset Value during the year. The decision to waive and/or absorb management fees and operating expenses is at the discretion of the Manager. The practice of waiving and/or absorbing management fees and operating expenses may continue indefinitely or may be terminated any time without notice to shareholders.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average Net Asset Value during the year.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a Fund's portfolio turnover in a period, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

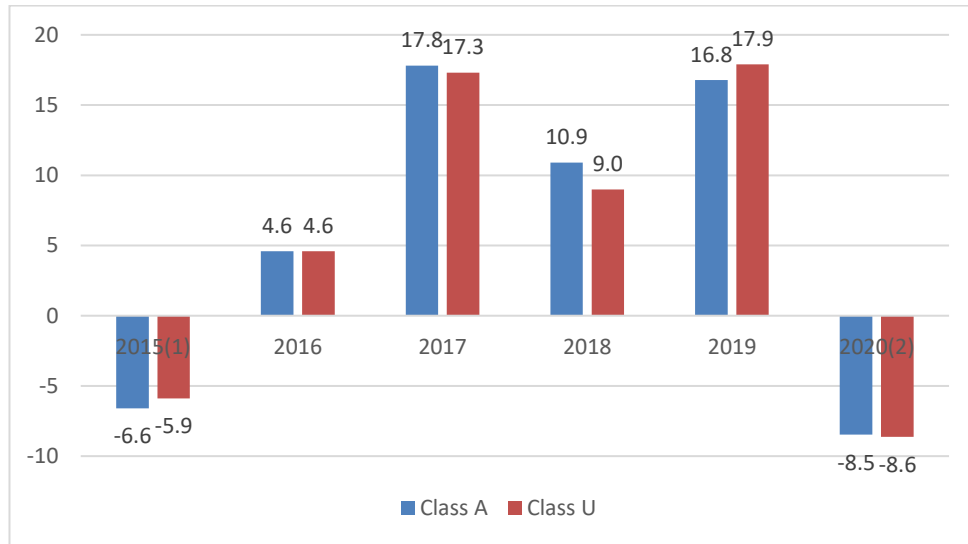

(5) Percentages are annualized.

(6) Units A and U for this Fund were first issued on July 15, 2015.
